

HIGH YIELD Green Foliage Pro (HYF)

**Cleaner foliage.
Healthier plants.
Better yields.**

HYF is a concentrated probiotic foliage wash formulated to help address powdery mildew and fungal contaminants on indoor and outdoor crops.

Designed for commercial grow operations, HYF can also help manage mite and aphid infestations in controlled indoor environments.

Its non-toxic formula can be used throughout the grow cycle — including up to harvest — helping support cleaner foliage without harsh chemical residues.

HYF can be used for both corrective treatment and ongoing preventative maintenance.
