

HIGH YIELD Root Wash (HYR)

Healthy roots

Root rot

Healthier roots. Healthier yields.

HYR is a concentrated probiotic biosurfactant root wash is designed to help address fungal root contaminants that can negatively impact nutrient uptake, root health, and crop performance.

Developed for commercial cannabis grow operations, HYR supports cleaner root zones and healthier root development while remaining compatible with existing nutrient programs and feeding schedules.

Its non-toxic formula is suitable for hydroponic and other grow mediums. It can be used throughout the entire grow cycle without harsh chemical residues.

Concentrated probiotic biosurfactant root wash designed for:

- Fungal root contaminants
- Healthier root zones
- Improved nutrient uptake
- Nutrient program compatible
- Use throughout grow cycle
- Non-toxic formula
- Hydroponic, and solid grow media
